Foreword

The survey of operating data compiled in this volume is the result of questionnaires completed by the many participating utility members of the American Water Works Association. The questionnaire submitted to the utilities appears on the following page.

Four tables have been used to make the data obtained readily accessible. The responses listed are from 1358 utilities located in 50 states, the District of Columbia, and Guam. The populations served by the responding utilities range from a few hundred to a few million, giving a wide variety of data.

Each utility is listed alphabetically within states, which are also alphabetical. The tables are meant to be self-explanatory. If there are any questions in regard to abbreviations used (especially treatment abbreviations), the reader can refer to the questionnaire for explanation.
